regional atlas

student population
in 2005-2006

french higher education

Types of institution

Higher education is provided in the universities, all of which are public with the exception of five Catholic institutions, or in so-called *écoles supérieures*, higher public-sector or private 'schools', some of which are known as *grandes écoles*.

Institutes or schools may be attached to universities.

They include *instituts universitaires de technologie* (IUTs) providing short technological courses, *instituts universitaires professionnalisés* (IUPs) for students working for qualifications in engineering, and *instituts universitaires de formation des maîtres* (IUFMs) which prepare students for competitive examinations to recruit teachers and provide teacher training, etc.

Some lycées contribute to higher education because they offer preparatory tuition to those seeking admission to the *grandes écoles*, in so-called *classes préparatoires aux grandes écoles* (CPGE), or because they include *sections de techniciens supérieurs* (STS, or sections for higher technicians) which provide short technical training courses.

Access

Universities accept holders of the baccalaureate, the *diplôme d'accès aux études universitaires* (DAEU, or 'diploma for admission to university studies'), or a qualification regarded as equivalent, without any further selection procedure, except in the medical, dental and pharmaceutical fields and in the case of the IUTs.

Admission to the most prestigious higher 'schools' normally known as *grandes écoles* is by competitive exa-

mination for which students receive preparatory tuition lasting two years in the CPGE, *classes préparatoires aux grandes écoles*.

Generally speaking, admission to the very wide variety of institutions in the non-university sector is based on strict selection procedures.

Qualifications

Long university courses have traditionally been structured into three successive stages of study leading to national degrees – and the data is still displayed this way in this ATLAS edition :

the *diplôme d'études universitaires générales* (DEUG, or 'diploma of general university studies') covering a two-year period after the baccalaureate (first stage); the *licence* (roughly equivalent to a Bachelor's degree, a further year) and the *maîtrise* (roughly equivalent to a Master's degree, a further year still, corresponding to four years after the baccalaureate) (2nd stage); qualifications obtained in the third stage of studies, namely the *diplôme d'études supérieures spécialisées* (DESS, or 'diploma of specialised higher studies'), the *diplôme d'études approfondies* (DEA, or 'diploma of more advanced studies') and the doctorate.

However, since April 2002 and in accordance with implementation of the Bologna Process to develop a European Higher Education Area, a set of regulations has been published with a view to gradually gearing the structure of French higher education to the European system, LMD standing for *licence, master and doctorat* (the data will fit this system in the next edition of this ATLAS).

Universities are structuring their courses into semesters and modules enabling students to obtain credits in accordance with the European Credit Transfer System (ECTS). Students who acquire 180 credits normally over a period of three years may obtain the *licence*; 300 credits are necessary (i.e. an additional 120 after the *licence*, corresponding to two further years of study) for the award of the *master*. Furthermore, there is a *master professionnel* (Master's vocational qualification) geared to the labour market, and *master recherche* (Master's research qualification), preparation for which is similar to study for the DEA and constitutes the first stage of doctoral studies lasting three years until the doctorate itself is obtained. The *écoles supérieures* (schools for higher education), including *grandes écoles*, award their own diplomas. Public-sector or private engineering schools award a diploma that has to be recognised by the committee for engineering qualifications. Business and management schools award a diploma which, under certain circumstances, may be recognised by the State.

Short technological higher education courses lasting two years lead to the *diplôme universitaire de technologie* (DUT) prepared in the IUTs, or to the *brevet de technicien supérieur* (BTS, or higher technician's diploma) that students work towards in the higher technician's sections in some *lycées*.

Adapted from Eurydice, information network on education in Europe (<http://www.eurydice.org>)

number of years
after *baccalauréat*

BTS: *Brevet de technicien supérieur* (Higher Technician Certificate)

CPGE: *Classe préparatoire aux grandes écoles* (Preparatory class for *Grandes Écoles*)

DAEU: *Diplôme d'accès aux études universitaires* (diploma that qualifies to enrol at university)

DUT: *Diplôme universitaire de technologie* (University degree in technology)

IUFM: *Institut universitaire de formation des maîtres* (University Institute for Teacher Training)

reading notes

This atlas presents the numbers of students enrolled in institutions and programmes of higher education, as recorded in the information systems and surveys of the Ministry of National Education, Higher Education and Research, the Ministry of Agriculture, Food, Fishing and Rural Affairs and the Ministry of the Family and Social Protection. The combination of the above resources can sometimes lead to an incremental number of duplicate records of students enrolled in the higher education system. This is because the same student may enrol in several programmes and may be counted more than once if assigned a different identification number for each enrolment.

The geographic unit used in the present document is the “urban unit”, or agglomeration; for the Ile-de-France region, the commune is the geographic unit of reference.

to learn more

Visit the website for the regional atlas on student population at www.education.gouv.fr/pid132/les-publications.html

The screenshot shows the website 'Atlas régional : les effectifs d'étudiants en 2004-2005'. The page features a navigation menu on the left with categories like 'Le sommaire', 'L'étude dans votre région', 'De la université au secondaire', 'Enseignement supérieur et Recherche', 'La formation tout au long de la vie', 'Europe et International', 'Carrières, emplois et salaires', 'Statistiques de l'éducation', 'Toutes articles', 'Métroclasse et Territoires', 'Les enquêtes', 'LES OUTILS', 'Visualisation interactive', and 'Archives'. The main content area is titled 'Sommaire' and includes sections for 'L'enseignement supérieur en France', 'L'enseignement supérieur en région', and 'Bonne de lecture'. A map of France is displayed in the center, with regions color-coded. The 'Bonne de lecture' section explains that the data is presented by agglomeration and that the same student may be counted multiple times if enrolled in different programs.

You can print and/or save the various parts of the present document from the website.

data sources and scope for these categories provided on page 192

An urban unit (in bold type) is a group of communities with at least 2,000 inhabitants in which no residence is separated from the next by more than 200 metres.

The other communes (not in bold type) are classified as rural communes.

The definitions of urban and rural territories are reviewed prior to each census. The definitions used in the present edition are those set forth in the INSEE 1999 census.

A given urban unit can extend to two or more départements.

An asterisk designates an urban unit in which the higher education sites are located in communes of different départements.

Total number of students enrolled in university programmes at:

- universities and affiliated institutions (including students enrolled in IUT and university engineering programmes)
- INPs and UTs (excluding engineering programmes)
- IUFMs

Total number of students enrolled in urban unit or commune.

When higher education units exists in several communes of a given urban unit, the breakdown per commune and per programme structure is also provided.

Population without duplicate records in INSEE 1999 census.

Population without duplicate entries	INSEE: 1990 and 1999 population census	Population without duplicate entries in census
Population by age group	INSEE: estimate of annual population by age group	Age of population taken at 31 December

glossary

	definition
percentage of <i>baccalauréat</i> holders in one generation	percentage of <i>baccalauréat</i> holders in a hypothetical generation of individuals, who, at each age, would have the same <i>baccalauréat</i> enrolment and success rates observed in the year being considered (by place of residence)
rural commune	commune not belonging to any urban unit
cycle 0	university cycle comprising the diplomas that qualify non <i>baccalauréat</i> holders to enrol in university programmes: DAEU (<i>diplôme d'accès aux études universitaires</i>), aptitude for law, etc.
university programmes	Branches of study offered at IUFMs, universities and affiliated institutions, including non-engineering branches of INPs and UTs.
population without duplicate entries	Total population minus duplicate entries: > military servicemen and student interns in the commune and who do not have a personal residence in the commune; > homeless persons under the administrative authority of the commune, but counted on the census in another commune; > persons having declared their personal residence in the commune but living in another commune; > students having declared another personal residence in the commune but who were counted in another commune. This concept is used to calculate the population of a group of communes (regions, départements, cantons, etc.).
higher education site	urban unit or rural commune in which at least one student is enrolled in a higher education programme, regardless of the type of institution (university, <i>lycée</i> , <i>école</i> , private faculty, etc.) or the nature of the programme (university or other).
university site	urban unit or rural commune in which at least one student is enrolled in a university programme (including IUT and university or non-university engineering programmes).
secondary site	urban unit or rural commune in which at least one student is enrolled in a university programme (including IUT and university and non-university engineering programmes) outside of the main university site.
main site	urban unit or rural commune in which the main site of a university or affiliated institution is located.
enrolment rate of <i>baccalauréat</i> holders in higher education system	percentage of <i>baccalauréat</i> holders enrolled in the higher education system in the year they obtained their <i>baccalauréat</i> out of the total number of <i>baccalauréat</i> holders for the corresponding year (by <i>académie</i>).
<i>baccalauréat</i> success rate	percentage of pupils who obtained their <i>baccalauréat</i> out of the total number of candidates present. Candidates are counted as present for the exam if they have participated in at least one test.
urban unit	group of communes with at least 2,000 inhabitants in which no residence is separated from the next by more than 200 metres.
multi-site university	university whose status lists several main sites. There are 4 multi-site universities: Université des Antilles-Guyane, Université d'Artois, Université de Bretagne-Sud, Université du Littoral.
universities and affiliated institutions	a category comprising the 81 French universities, 2 CUFRs (Albi and Nîmes) and 5 <i>grands établissements</i> (IEP de Paris, INALCO, Institut de physique du globe, Paris Observatory, Paris-Dauphine).
universities and affiliated establishments	a category comprising the 81 French universities, 2 CUFRs (Albi and Nîmes), 5 <i>grands établissements</i> (IEP de Paris, INALCO, Institut de physique du globe, Paris Observatory, Paris-Dauphine), 3 National Polytechnic Institutes (Grenoble, Nancy and Toulouse) and 3 Universities of Technology (Compiègne, Troyes and Belfort-Montbéliard).

Ministry publications prepared by the DEPP

The publications of the Ministry of National Education, Higher Education and Research prepared by the DEPP present complete statistical data from systematic surveys, series of analytical indicators, summary articles, articles on methodology, and results of studies and research: they allow the reader to go beyond the concise data provided in the present document and arrive at a deeper understanding of the French education system.

> *L'état de l'École* (The State of Education)

The main data on the French education system, updated annually. An analytical summary of the costs, activities and results of the school system, from preschool through higher education. International indicators allowing a comparison of France with other countries.

16 euros, Edition no. 16, October 2006.

> *Géographie de l'École* (Geography of the school system)

The main data on the French education system presenting differences in geographic regions. An analysis of the data by académie, region and département, from preschool through higher education.

20 euros, no. 9, May 2005.

> *Repères et références statistiques sur les enseignements, la formation et la recherche* (Statistical points of reference on teaching programmes and branches of study)

Detailed statistics on all areas of the national education system, with clear and concise explanations, definitions, reference documents and an index.

26 euros, September 2006.

> *Les Notes de la DEPP* (DEPP Notes)

– Information Note

Each report takes stock of one of the aspects of the French education system and gives a clear and concise presentation of the conclusions drawn from the latest surveys and studies.

– Evaluation Note

Evaluation reports summarize evaluations focusing on the results of the French education system, as well as its procedures and factors contributing to its effectiveness.

– Research Note

Research reports take stock of certain aspects of French research. They summarize the results of statistical surveys and studies performed or organised by the Bureau of statistical studies on research.

2006 subscription:

France + Overseas territories: 45 euros,

Abroad: 48 euros.

> *Éducation & formations* (Education & Training)

An informative magazine with articles on the major challenges and stakes inherent to the French school system. A DEPP publication available to the various actors involved in the French education system.

2001 and 2002 editions: 12.20 euros.

2003 edition and beyond: 13 euros.

> *Les dossiers*

Each *dossier* focuses on the results of a study or evaluation of a given topic, offering a full detailed report on one of the aspects of the French education system. A significant part of the dossier is devoted to the methodology necessary to understanding the results.

No. 141 and beyond: 15 euros.

> *Regards sur le système éducatif français* (French education system at a glance)

CDRom - Mac or PC

An interactive exploration of the French education system. With more than 30 commented slides, this CDRom gives access to the results of surveys and studies performed by the DEPP.

2004 edition: 24 euros.

All publications are sold by mail or on-site at the Département de la valorisation et de l'édition

61-65, rue Dutot – 75732 Paris Cedex 15 – tel +33 (0)1 55 55 72 04 – fax +33 (0)1 55 55 72 29

You can also buy them at the **Librairie de l'Éducation** (Centre national de documentation pédagogique – 13, rue du Four, 75006 Paris), in the bookstores of the CNDP network (CNDP/CRDP/CDDP) and at the bookstore of the **Documentation française** (29, quai Voltaire, 75007 Paris).
